AMIRAH DZATUL HIMMAH

Software Engineer

Depok, Indonesia | +62 821 1464 3544 | amirahdzh@gmail.com | amiw.dev | GitHub

Software engineer working in C#/.NET and TypeScript, with Linux infrastructure and software delivery experience, including GDPR-compliance software. I start by understanding what people need, then build it end to end: data model, application, admin tools, and the pipeline that deploys it. Stack-agnostic: I pick the tool that gets the job done. I also take on freelance projects for small businesses: websites and workflow automation.

Experience

PT Sanbersy, Bandung **Feb 2025 - April 2026**

Software Developer (Remote)

- Collaborated on web-based projects for academic and nonprofit institutions.
- Contributed to a conference management system and a donation platform for Rumah Amal Salman.
- Handled both frontend and backend development using Laravel and Bootstrap.
- Conducted manual QA testing for web applications, created test documentation, and reported bugs.

Tech stack: Laravel, MySQL, Bootstrap, Postman, Jam.dev

PT Mega Giga Solusindo, Yogyakarta **May 2025 - Sept 2025**

Web Developer (Contract, In-office)

- Worked on web development tasks, including bug fixes, hosting configurations, and content updates.
- Supported other divisions by applying IT and web knowledge to make content and site management easier.
- Coordinated with stakeholders to ensure updates matched operational needs.

Tech stack: React.js, Next.js, REST API, Git, Tailwind, Typescript, Strapi

PT Indonesia Comnets Plus (Icon+), Jakarta **June 2025 - July 2025**

Front-end Developer (Client Assignment via PT Mega Giga Solusindo)

- Fixed bugs and UI issues reported by QA and end users to keep the *Alih Daya* application running smoothly.
- Improved interface responsiveness, resulting in a faster and more consistent experience.
- Worked closely with QA and backend teams to deliver timely fixes and small feature enhancements

Tech stack: Vue.js, JavaScript, REST API, Git, Tailwind

Projects

Yayasan Web Platform
Role: Full-stack developer (end to end)
Summary:
Developed a web platform to represent a nonprofit organization and facilitate online donations and program management.
Tech stacks: Nuxt.js, Laravel, and MySQL

Miaw's Bot — Personalized Discord's bot
Role: Full-stack Developer (end-to-end)
Summary:
Built and maintained a customizable Discord bot supporting slash and prefix commands, reaction roles, team assignments, and private/public messaging. Designed for flexibility and extensibility with real-time logging and voice activity tracking.
Tech stacks: Node.js, Discord.js, Typescript

Education

Universitas Pendidikan Indonesia, Indonesia **2020 - 2024**

Bachelor Degree in Computer Science

- Focused on Artificial Intelligence and Computer Vision.

- Conducted research on classification models for chili plant diseases, optimizing performance through augmentation, transfer learning, and fine-tuning.
